

# F3000

Often referred to as a ‘crane type’ Building Maintenance Unit (BMU), the CoxGomyl™ F3000 is used when the reach or suspended load is increased beyond the capabilities of the E-type machines. This economical BMU has an impressive higher load capacity of 500 kg for the auxiliary hoist and a reach of up to 14 metres, and is manufactured within 12 weeks or less for any machine in the range.

Like the E3000 machines the F3000 features upper and lower safety bars on the platform and a auxiliary hoist for window replacement. The F3000 is simple to install, safe to operate and adjustable in reach, drop and gauge. The F3000 is also suitable for replacements due to its lightweight, robust construction.

<b>Design Standard</b>	EN 1808:2015
<b>Maximum Rated Load</b>	300 kg
<b>Maximum Operating Height</b>	235 m
<b>Dimensions</b>	<b>L1 (max)</b> 13000 mm <b>L2</b> 1200-1500-1700-2000 mm <b>L3 (min)</b> 350 mm <b>H (max)</b> 7000 mm
<b>Wire Rope</b>	7-8 mm Galvanised wire ropes
<b>Crossbar Slew</b>	± 90 °
<b>Body Slew</b>	± 180 °
<b>Cradle Type</b>	2 m Aluminium Cradle
<b>Track System</b>	Front Angle Guide or Twin Track

### Standard Features

- Full galvanised finish
- Rollers or telescopic wheels on platform
- BMU weight max < 10 Tons
- Install crane capacity required < 2 Tons
- Standard Safety Features: Hoist over speed device, cradle lower trip bar, ratcheting straps to secure the cradle, lower roller buffers, rubber protection on all corners, lower trip bar.

### Optional Features

- Range of colours available
- Cable reeler (22 m)
- Auxiliary hoist - 500 kg max
- Subframe platforms
- Painted counterweight
- Track switch
- Anemometer
- Facade restraint system
- Upper trip bar
- Luffing for parking
- Cradle Complements: Upper, rear and lateral buffers, upper and lower safety bars, upper telescopic wheels, cable bag, guard rail, telephone, castor wheels, cradle paint, detachable cradle.
